

# Is Your Data Ready for the AI Era?

*Not just technically—strategically.*

## USE CASE ALIGNMENT

Volume  
Quality  
Trust  
Diversity

## CONFIDENCE REQUIREMENTS

Validation  
Performance  
Version Control  
Testing  
Observability

## GOVERNANCE FIT

Stewardship  
Regulations  
Ethics  
Bias  
Data Sharing

**MegaminxX**

# The Problem

- **Dashboards go live — but no one trusts the data**
- **Models run — but make wrong assumptions**
- **Automation works — until it doesn't**

**Because the data isn't ready.**

# Data Aligns with modern use cases?

*Without alignment, even the smartest models stumble.*

**Modern Use cases and solutions demand specific data traits:**

- **Volume:** Ensure enough data to detect patterns (e.g., seasonality)
- **Quality:** Ensure data is complete, accurate and stable
- **Trust:** Build reliability through pipelines
- **Diversity:** Include varied sources to reduce bias

**MegaminxX**

# Data Quality Trusted for Decisions?

*Unreliable data = brittle AI. Full stop.*

**Data quality = trust in data-driven decisions. Key metrics:**

- **Validation:** Run ongoing checks for evolving needs
- **Performance:** Track speed and cost efficiency
- **Version Control:** Log pipeline changes
- **Testing:** Detect data drift via test cases
- **Observability:** Monitor health and freshness

# Is your Data Safe to Scale?

*Ethical gaps today = reputational fires tomorrow.*

**Governance is not just compliance — it's risk management. Check:**

- **Stewardship:** Define policies for access and usage
- **Regulations:** Ensure compliance with GDPR, HIPAA, etc.
- **Ethics:** Address synthetic data, consent, or misuse risks
- **Bias Management:** Test for edge-cases
- **Sharing:** Enable responsible data access

**MegaminxX**

# Fix the Foundation First - 3-Step Roadmap to AI-Ready Data

## Align

Align your Data with  
Modern Use Cases

## Trust

Ensure Data Quality is  
Trusted for Decisions

## Govern

Ensure your Data is  
Safe to Scale

That's when **Data Modernization** — stops being a buzzword—  
and starts driving true business advantage.
